

III. Human Resources

E. Evaluation

3. Teacher Evaluation

The purpose of teacher evaluation in the Narragansett School System is to provide a structured, supportive, and collaborative environment that will promote professional growth, enhance student learning, and further the district's mission.

Evaluation and assessment are necessary aspects of teaching and learning. They must provide opportunities to develop teaching practice and assure that instruction and interaction helps students achieve their full potential. The Narragansett School System teacher evaluation will provide for a continuous cycle of assessment to ensure that all teachers meet the district's standards for teaching. The Narragansett School system uses the document entitled "Teacher Evaluation Handbook, September 2004" in its evaluation process.
